COMPOSITE DECKING

Introducing...

EVA-LAST[®]
INSPIRED BY NATURE, DESIGNED FOR LIFE.

Infinity[®] **IS**

ULTIMATE DURABILITY
One of the toughest co-extruded composites available

RESILIENT PROTECTIVE CAP
Advanced polymer cap resists scratches, fade, mould, & mildew

EXCEPTIONALLY LOW-MAINTENANCE
Only the most basic of cleaning required for optimal longevity

DECAY & WEATHER RESISTANT
Top protection from bleeding, odour, insects, UV, & harsh weather

STAIN RESISTANT
Protective cap prevents stains for long-lasting beauty

SLIP RESISTANT
Thoughtfully engineered textured finish keeps you safer

NATURAL LOOK
Streaked colour variations for the look of timber

ENVIRONMENTALLY FRIENDLY
Historically sustainable manufacturing & use of raw materials

Ready Mixed Concrete, Mortar & Screed

- Cheaper than mixing on site
- 4 - minute waiting time
- Small quantities available
- Better quality mix than mixing on site
- Discounts on orders over 1m³

General Information

Do's ✓

- View samples prior to purchasing.
- Buy 5% extra to allow for cuts and breakages.
- Buy paving from one batch if possible.
- Inspect paving prior to laying.
- Dry paving where dimensional accuracy is critical.
- Always mix paving from all packs to assist colour blending.
- Lay on a full mortar bed. Never spot bed paving.
- Keep paving clean as you point, wiping away cementitious spillage.
- Always lay natural stone with chamfered edges facing down.
- Always use a slurry primer on the back of porcelain tiles and SBR adhesive on the back of Natural Stone Slabs.
- Always follow the supplier's guidelines.

Batches

- Variations in colour and texture are natural characteristics. Colours shown in this brochure are indicative only.

Don't's ✗

- Butt paving flags together as this will not allow for any dimensional tolerances or expansion and contraction of the paving which could cause spalling.
- Use acid to clean paving.
- Use Rock Salt or De-Icing Salts on concrete paving. Salt corrodes and destroys all concrete through a chemical reaction and in addition will exaggerate the natural freeze thaw cycles that erode the surface of concrete.
- If you intend to seal your paving, make sure it is completely dry and free from efflorescence. It may take a period of time to ensure that the bed underneath has fully dried out.

Efflorescence

Efflorescence is a naturally occurring phenomenon when temporary white stains may appear on the paving product surface.

This is inherent in both concrete and natural stone products, and not a product defect. Over time, these stains are gradually washed away by rain and weathering.

Carvers cannot accept responsibility for these natural occurrences.
